User Manual

**Car Entertainment and Navigation System**

Android series

Android series

In order to use the device in the correct way, please read the manual carefully. We will not notice you the specification or design update of due to the technology improvement.

Thank you for choosing the car audio-visual navigation system of this company!

When you use this product, please read all the information attached with it, this manual is introduced all the functions of audio-visual navigation system ,so that you can facilitate the process easier. Through it, you can obtain information about products introduction, operation methods, make sure the operation is more convenience.

The display picture example of manual referenced may be a little different from the actual picture.

The display contents of this manual may be a little different with the actual content.

If any parameters change when Products continue to update and upgrade their functions, will be added to make without notice. Any problem please check the details with the agent, thank you for your support and cooperation!

Contents

⚠ Warning

➤ In order to avoid accidents, a possible violation of applicable law, do not use other function as purposes expect navigation when driving.

➤ In some areas, it is illegal for the drivers or other people in car to watch the images of the display.

◣ Notice for safety items

➤ In order to avoid any injury or property damage of the user or other persons, please be sure to read in details and abide the following notice item.

1) Read the Manual

2) Take good care of the Manual for future use.

3) To comply with all the warning and notice of this manual.

4) To comply with all operating instructions.

5) Regarding the power supply, please refer what the manual stated.

6) The installation and wiring distribution of this product needs specialized skills and experience. To ensure safety, commissioned by professional technicians for installation and wiring.

7) There is not any parts attached with the products for user to repair and replace, please ask the professional technician with qualification of maintenance to repair and replace.

8) Ventilation: Do not plug any ventilation cooling vents, the local shell holes and other openings are for ventilation of heat. In order to ensure machine works stable and reliable, long service life, not to plug the hole cooling, ventilation environment must be maintained to avoid overheating the machine caused by smoking, fire or other danger.

9) Avoid heat source: heat source should be avoided and products will be not installed on local exposure to direct sunlight, high temperature areas; to be away from heat sources, such as heating, heaters, heat or have other things (including magnifier).

10) Avoid Water or Moist: device should avoid water or moist, do not let this machine being exposed to rain or moisture in the environment (as when rain and car washing) to avoid the internal machinery of the short circuit caused the fire, electric shock or other danger.

11) Cleaning: before cleaning machines have to shut down power, and then wipe panel Do not use volatile chemicals (such as gasoline or thinner) to clean panel.

12) Avoid the matter or water into the device. to prevent foreign matter or liquid into the inside of the machine, do not insert the foreign body from the cooling hole or other opening into the machine. If you insert foreign bodies may cause electric shock, machine parts within a short circuit caused the fire, such as the risk of electric shock.

13) Installation device. do not install the unit to the truck, frame, tripod, bracket or table without the manufacturer's recommendations, should be installed on the install fittings which come with machines. When used in the car, pay more attention to firm the installation of this machine, avoid the machine falling down because of the sudden brake and resulting in personal injury.

14) Don't operate the machine in the event of rain or lightning for a long time, have to cut off the machine power.

15) Appear in the following situations, please turn off the local power supply in time, and contact with professional technician.

A. When the power wire or connector damaged.

B. When the machines were splashed with liquid or when the entry of foreign matter;

C. when the machine has been rained or moisture attack;

D. when the machine crashed from a height or as a result of abnormal operation or unreasonable damage caused.

16) LCD Display: do not let the machine decline to avoid LCD screen fragmentation, if so, when the outflow of liquid crystal, do not touch the liquid crystal, so as not to be harmed. Do not heat the liquid crystal display or scratching LCD with sharp objects, touch panel is also susceptible to scratching. The effective pixel of LCD screen is more than 99.99 percent, but 0.01 percent of the pixels could not be lighten normally.

Notice before Installation

➤ Products of the manufacturers recommend that you do not install or repair their navigation systems by yourself. Installation and maintenance of the product may cause you in danger of electric shock or others, for all installation and maintenance operations of this navigation system please entrust to the service center authorized by manufacturer.

➤ Forbid to use the following dangerous installing ways and location:

1. When the car in a sudden stop may cause injury on the driver and passengers.

2. To avoid the possibility that impeded the operation of the vehicle drivers, such as the driver front seat or the floor near the steering wheel, stick shift.

➤ Before opening the hole from faceplate in the dashboard panel, make sure that the rear space is enough. Be careful, not to damage the fuel cable, brake cable, electrical components, power lines or cable communications.

➤ When use the screws, please ensure that they are not contact with any electrification down-lead. Vibration may have damaged wire or insulation skin and lead to a short circuit or other damage to the vehicle.

➤ In order to ensure proper installation, use the standard method of installation of the required components. If you use any non-standard components, this product can be internal damaged or loose components, leading to damage of the Product.

➤ If the GPS antenna may lead to the winding column or stick shift that would

be very dangerous. Please ensure that the installation of the product will not disturb driving.

➤ Please ensure that all leading cable will not be caught by the doors or sliding framework in the seat, so as not to cause a short circuit.

➤ After finish the installation of navigation systems, please check vehicles and other equipment is correct.

➤ Some countries may prohibit or restrict to install or use of the system in the vehicle. Please comply with all the rules related to the application of laws and regulations when using, installation and operation of the navigation system.

➤ This product will be installed in the position between the driver's seat and passenger seat in order not to avoid any damage on the unit by driver and passenger when the car suddenly brake.

➤ Never install this product on the dashboard, door or columniation and girder, and the position the air bag expanding out and nearby, Please refer to your vehicle owner's manual to find out the area front airbags expanding

➤ Do not install this product on the location may prevent the vehicles, including airbags, pillows and any operating system performance.

➤ Avoid the electromagnetic interference: In order to avoid Electromagnetic interference, please try to stay away from the following components of this product, cable or other wire. (FM, AM antenna and its wire, GPS antenna and its wire). And you should arrange every wire to stay away from each other, not make it colligation or cross-banding together. EMI will increase the possibility of showing wrong location.
System installation

➤ **Voltage rating (as the picture –01)**

1）This product use for the vehicle with 12V battery and negative GND. Before the installation, check the battery voltage.

2）In order to avoid short-circuit system, installed prior to the proposed removal

of the battery negative.

3）Don't cross the fuse of the device, directly connect to the battery.

(Picture-01)

➽ **The installation of the device**

1）First of all, take the original vehicle CD player out.

2）Remove the install bracket and screws and keep it.

3）Fix the bracket through the screws on the navigation system device.

4）Don't connect this product power wire directly to other power-line circuits.

5）Fix all the cables according to the hose diagram.

6）Install the navigation system in right position and then screw the bracket of the original car to fix it well.

⚠ **Note:** Do not damage or dirty the Dashboard.

➽ **The installation of GPS antenna**

1) To install the antenna in the inner of the car(on the rear shell),please try to make the metal plate stick on the horizontal lever so that the GPS antenna towards the window. GPS antenna will be placed on the metal plate. (GPS antenna fixed by magnetic.)（picture-02 ）：
GPS antenna

metal plate please peel the paper at back

⚠ NOTE：the metal plate have powerful glutinosity to leave the impress when you remove it.

please sweep the place to make sure no dust,wet,oil or dirt before you stick.

(Picture-02)

2）To install an external antenna (on the car),GPS antenna will be placed in a level position as far as possible, such as roof or cover suitcase Department. (By a fixed magnetic body.)（picture-02 ）:

⚠**NOTE:** Paste the metal plates, should not be cut it into small pieces. Some models of vehicles do not allow glass windows GPS satellite signal penetration. Then, the GPS antenna should be installed at the outside of the vehicle.

GPS Antenna

When the lead contacts the up

of the car door to circle au-turn in order to prevent the rain water flows along the lead to the in-house of vehicle.

Waterproof mat
Please make sure water-proof mat to contact the top of rubber pad.

Curving the lead to a circle out side the rubber pad in order to prevent rain water flows along thelead vehicle in-house.

(Picture-03)

🔳 **Other notice**

➽ **Operation of remote control**

Do not put remote control on the dashboard, the steering wheel or sunbaked place, especially in the summer as the high temperature will lead to deformation of the remote control. When the car stopped in the sun-baked place, the remote control should be placed on storage boxes or sunproof area. Under direct sunlight, the signal from the remote control may not be correct to receive by the device. Therefore, please put remote control near the front panel of sensors.

➽ **On the proper use of batteries**

If used the battery in a wrong way, due to rupture and leakage of electrolyte and cause fever, fire, injury or failure, as well as the use of pollution around the danger.

1）Please put the batteries in the remote after confirm the + and-of batteries.

2）Please use the batteries we suggested.

3）Please change the exhausted batteries in time for your better use.

4) Please take the batteries out, if you don't want to use the remote for a long time.

5) Bind up depleted batteries with adhesive tape or store them in a plastic bag for insulation in storage.

6) Never charge, short-circuit, dismantle, deform and heat the batteries or throw them into fire or water and make them contact with any metallic object

7) Never place batteries or remote control loaded with batteries in the surroundings at high temperature including an enclosed vehicle with doors and windows closed, trunk or a place in the direct sunshine and adjacent to a heater.

8) Keep batteries away from children. Send the children to the hospital immediately if they swallow down any battery.

➤ **Notice about Batteries**

1) Type of Battery: lithium battery

2) Operation Life: approx. 1 year (under indoor temperature) in normal operation

3) While disposing batteries, make sure to observe the local regulations on depleted batteries.

➤ **Treatments for battery electrolyte leakage are presented below:**

1) Wipe off the electrolyte residue inside the battery compartment and put in new batteries.

2) When the leaked electrolyte attaches to the human body or skin, rinse it off with water.

3) If the electrolyte enters your eyes, do not rub with hands but rinse with water and then go through the medical treatment. Emergency Treatment:In order to prevent life or property damages to the user or others, please immediately turn the power off and deliver it back to the nearest maintenance center or

automobile stereo system dealer for assistance in the case of any foregoing abnormality ,Battery Installation (Picture-04):

4) Take out the battery holder. Push and press the point A along the direction shown by the arrow and draw out the battery holder at the point B.

5) Put the battery into the battery holder.

6) Insert the battery holder back to the original place.

At the first time before operation,draw out the extruding thin sheet beneath to make the battery contact normally.
(Picture-04)

➤ **The DVD Disk format**

The DVD player can play DVD disk which have marked format as Following (picture-05) :

VCD   CD   MP3   MP4
⚠ **NOTE:** DVD player can't play the disk which the region code is not compatible. (DVD player is full region code)

(Picture-05)

➤ **The maintenance of the DVD player**

Please use the conventional circular disk, not to insert irregular, noncircular disk, otherwises these disks may be stuck inside the DVD player, or the DVD player may not correctly play. Please check before playing on the disk if there is cracks, scratches or curly. Such discs may not play and lead to product failure.

Right   Wrong
(Picture-06)

Do not use this type of disc. Using disk, do not touch the recording surface (nonprinted surface) Please put the disk in the box if it's not in use. Please don't put the dish far away from the direct sunlight and high temperature place. Please don't put the label, write, paint on the disk surface, or use chemicals on the disk. Please use soft dry cloth to clean the disk from the centre to outside. The DVD player is likely to be internal components moisture if the car using central heating. The dew may cause DVD player can't work properly. So please stop the unit about 1 hour to make the unit clean and dry, if you find the fault like that. And clean the moisture on the disk with soft cloth. The DVD may be disrupted if the car running on a bumpy road.

➥ DVD disk

Regarding some disks, maybe can not use the some special function. Maybe can't play some disks.

➥ DVD digital multi-functional disk

(also known as "Digital Versatile Disc" or "Digital Video Disc") is a popular optical disc storage media format. Its main uses are video and data storage. Most DVDs are of the same dimensions as compact discs (CDs) but store more than six times as much data.

➥ DVD Menu

DVD can show couple of titles, the title menu. Besides, DVD title menu can make some kinds of items shown, the sub-menu came out during the playing, the Dolby Digital and PCM audio, caption, language changed according to the software. While the unit play DVD-R/DVD-RW discs , it only play video format (under video mode), not play the PC files. DVD-R/DVD-RW disks recorded may not play properly due to the property of disk, scratches or dirt on disks or dew on the lens of unit. Disk recorded on personal PC maybe not worked properly, it depends on the setup and environment of the application format, therefore please use a proper format of recording.

➥ CD-R/CD-RW Disk

The DVD player only play completed CD-R/CD-RW Disk. CD disks recorded on personal PC recorded may not play properly due to the property of disk, scratches or dirt on disks or dew on the lens of unit. Disk recorded on personal PC maybe not worked properly, it depends on the setup and environment of the application format, therefore please use a proper format of recording.

CD-R/CD-RW maybe not worked properly under direct sunlight or being in high temperature storage place in the car. The DVD player can not be worked properly with Recorded CD-R/CD-RWDisk's title and information data. (under Audio data CD-DA) You will wait a little long time for CD-RW Disk comparing to traditional CD or CD-R. Please look at the notice before using CD-R/CD-RW notice. MP3 Files (CD-ROM)

➥ MP3 Files (CD-ROM)

MP3 is a kind of audio compact method, which should be brought into Audio level 3 in the MPEG standard. The audio compact method has already been in the depth of personal computers as a standard mode. MP3 can compact original audio data to 10% of its initial size and to keep the voice in high quality. This means that about 10 Track CDs can be recorded on a CD-R disk or CD-RW disk. In this case, there is no need to constantly change CD disks for playing for a long time. This player allows the playing of MP3 files on CD-ROM, CD-R and CD-RW disks as well as the content of any disks compatible with ISO9660 Levels 1 and 2 and ROMEO and JOLOEY file system. It can play the disks recorded compatible in multiple sections.MP3 files are incompatible with the transmission of data written in groups. The maximum number of characters that can be displayed as names of files is 32 characters (calculated from the first character). The maximum number that can be displayed as the name of a folder is 32 characters. If a file is recorded in the ROMEO and JOLIET file system, it can display 32 characters only. When a disk with Mp3 files and audio data (CD-DA), for example, CD-EXTRA and MIXED-MODE CD, they can switch between MPEG and CD-DA to play these two types of discs. The selection sequence of playing and other folders being operated will become the writing order used by writing software.

Therefore, the sequence expected by the playing time can't be inconflict with the actual playing. However, some software permits the setup of playing sequence.

⚠ **Notice:**When one MP3 file is named, please add the corresponding file extension name(MP3). This player will play the files with the extension name (.MP3) as Mp3 files. To prevent noise and failure, please do not use such an extension name for non MP3 files.

◤ Button function instruction

➢ 【 ▲ 】 button

When the unit is off, press this button to start the unit and enter into DVD interface; when the unit is on and there is disc in it, press it to eject the disc.

➢ 【 MENU 】 button

In any interface, press this button into the relative menu interface

The MENU button in different interface has different functions, please refer to the system function operation instruction.

➢ 【 BACK 】 button

In any interface, press this button to back to previous interface.

➢ 【 Power 】 button

When the unit is on, short press this button to close the screen and long press it into off status. When the unit is off, short press it into on status.

➢ 【 HOME 】 button

Knobs: when the unit is off, press the button to start the unit; when the unit is on, switch the knob to right side, the volume plus, switch it to left, the volume minus, short press it to switch from mute or non-mute status; long press it to turn the unit off.

➢ 【 RESET 】 button

Stick a needle into the little hole and it will back to the factory original setting mode.

⚠ **Note:** In some models this knob is used for volume adjust button, some is used for volume adjust knob, some models with full touch screen that haven't the button and knob, **it is based on the model you purchased.**

1、【Power button】 When the player is off , the player will be power on by pressing this button; when powered on, the player will be power off by pressing this button.

2、【Display angle minish button】this button is no available with the fixed panel models.

3、【day/night mode button】short press this button to switch day mode and the nigh mode.

4、【image mode button】short press this button for different images mode setup , brightness, contrast, hue from 0-40.

5、【DVD button】short press this button to login the DVD player.

6、【direction button to left】

7、【confirm button】

8、【navigation button】short press this button to enter GPS interface .

9、【receive button】after the player matched with your mobile phone, press this button to answer an incoming call.

10、【system setup button】press this button to enter system setup interface.

11、【eject button】the disk come out after press this button.

12、【play/pause button】 when you inserted a disk, press this button to playing , when the player is playing, press this button to pause playing; when the player on paused and stopped status, press this button to playing.

13、【last song】press this button to repeat play the previous song or the previous video.

14、【fast forward button】 press this button for fast forward playing.

15、【system setup button】short press this button to enter in the DVD setup interfaces.

16、【volume – button】short press this button to decrease volume.

17、【LCD in and out button】just useful for one din universal.

18、【display angle increase button】the button is no effect for the fixed panel models.

19、【audio setup button】short press for individuated audio setup .

20、【PIP button】short press this button to enter the PIP interfaces.

21、【src player button】short press this button for the main menu.

22、【direction button】up.

23、【direction button】 right.

24、【radio button】when power off , the system will be power on and entering radio interface by pressing this button; when powered on, in the non-radio interface, short press this button to enter radio interface; in the radio interface, short press this button to switch between FM1,FM2,FM3 and AM.

25、【direction button】down.

26、【hand up button】when power off , the system will be power on and entering Bluetooth interface by pressing this button; in the Bluetooth interface, if your mobile phone matched with the player, press this button to hang up.

27、【information button】short press this button to display the information like the title and sequence number of segment about the playing program.

28、【stop button】press this button to stop playing.

29、【next song】press this button to playing next song or next video.

30、【fast forward button】press this button for fast forward playing.

31、【mute button】short press this button for switch mute or non-mute.

32、【 volume+ button】short press this button to augment volume.

33、【number button】number from 0-10.

Turn on/off the unit

Turn on the unit

If you turn off the unit by taking out the car key last time, then when you insert the car key again, the unit will turn on automatically. If you turn off the unit by pressing the power button last time, then please press power button to turn it on.

Power off

he system will be power off by pull out the car key. The system will be power off by long pressing this button.

Main Menu

1)When the unit is on, system will enter into main menu automatically. In other interface, press HOME button to get into the main menu, like (picture-07):

（picture−07）

2)Main menu shows the current date and time, you can adjust it in the system setting menu.

3)The icon below the interface is shortcut icon, totally 6 pieces, you can select the 6 icons you like, see the (picture- 08):

（picture−08）

4)All the function icons could be slipped to turn/switch the page, see the (picture - 08,09):

Set the shortcut icon

1) In any interface, long press the function icon for 2 seconds, it will tremble and enlarge, then you can drag it into the shortcut icon bar, or you can delete it from the shortcut icon bar.

（picture−09）

Notice: GPS works in a complicated program which easy to be fluenced by magnet or other external surroundings, leading to failed work(like no image and can't enter into GPS map). If situation like this, please restart GPS and it will back to normal.

Radio Function

Exit/Enter

In main menu, press [FM] icon into radio function, like (picture -10):

Press Home, BACK, and [⮌] icon to exit from radio interface, but the radio is still on.

（picture-10）

Setting operation

Press [⚙] icon into radio setting menu, like (picture -11, 12, 13):

Setting function include RDS\AF\TA\ PTY\PTY SCAN\MODE\AST\ST and so on.

1) RDS: RDS function is a special radio system developed by BBC company, which could only be used in Europe area.

2) AF: AF table offers the information sent by the same or adjacent transmitter which receives the broadcast of the same program, the receiver stores this table in order to reduce the time of the search of alternative frequencies. (Needs to be supported by RDS fucntion)

3) TA: TA is a switching signal, specializing in traffic announcement broadcasting status. The receiver will automatically switch to the program which is broadcasting the traffic announcement according to the received signal.

（picture-11）
（picture-12）
（picture-13）

After the announcement finished, it will automatically get back the previous menu/function .(Needs to be supported by RDS function)

4) PTY: PTY is A type of program ID, along with the launch of a program, which category the broadcasting programs into the specified programs among the 31 such programs. Receiver Click ID to receive, record this type of program(Needs to be supported by RDS function)

5) MODE: Remote/short distance earch, LOC remote search, DX short distance search

6) AST: Automatically search stations

7)ST: Stereo

Automatic Search

In the setting interface, choose AST icon, press [✓] icon into automatic search, during the search , the stations will be stored automatically, press any icon to stop the searching, like (picture 14):

（picture-14）

Semi-automatic search

Press [◄◄] icon or [►►] icon into low frequency/ high frequency semi-automatic search status. Press it, it starts to search, press again, it ends searching. Or drag the [▬▬▬] icon into low frequency/high frequency semi-automatic search status. When the station searched, it will be stored automatically.

Fine-tune search

Press [◄] or [►] icon into higher frequency/ lower frequencyfine tune search. When stations searched, it will be stored automatically.

⚠ Notice: In the factory mode interface, you can set the region of radio(Detailed operation please refer to Factory mode setting function).

❖ Remote automatic search/ Semi-automatic search

1) Remote automatic search: on the setting interface, press MODE icon, then select LOC, then press AST icon into remote automatic search. During the search process, the stations will be stored automatically, like (picture -15,16):
（picture−15）

2) Remote manual search: on the setting menu, press MODE icon, select LOC, then pres ⬅ icon to back to radio interface. Press ⏭ icon or ⏮ icon into low/high frequency remote manual search. Press it to start searching, press again to stop searching. When the stations searched, they will be stored automatically, like (picture -15,16):

（picture−16）

❖ List playing

1) During the search process, the stations will be stored automatically into the station list. Press ☰ icon to select the station you want to play.
2) Press ▲ icon to turn to up page, press ▼ icon to turn to down page, or slip ▤ icon to move from up to down page.

（picture−17）

❖ Band Selection

Press the "BND" icon, the band can be switched between FM(MHZ) to AM(KNZ) .

FM band: This unit can be saved for 100 channels.

AM band: This unit can be saved for 100 channels.

（picture−18）

▨ Bluetooth Hands Free communication operation

1) The system features with BT hands-free communication function. If your mobile phone equips with BT function, you can set up point to point link with the system, dialing, answering phone, as well as playing music and other functions on the screen.

2) Since there are various brands of mobile phone, their BT module is different from each other. So when it comes to the practical use, some of the functions might be different, even some of them might not compatible with our unit, please forgive for this.

❖ Enter/Exit

On main interface, press 📞 icon into BT interface, see (picture -19):
Press ⬅ or ⌂ icon to exit BT interface.
（picture−19）

❖ Pairing and Link

1) Before using the BT hands-free communication function, please pair and link it with your mobile phone first. Press ⚙ icon on the main menu, select BT setting, like (picture -20):

2)Press BT icon, then click on ✓ icon to turn on the BT function and meantime turn BT function of your mobile phone on. Press "Link" icon, then the unit will search automatically. When the system is linked to the phone signal, your mobile shows on the screen. Link it and input the PIN code. After successful match and link, an icon like 🔵 will shown on the bottom right of screen.
（picture−20）

➢ **Dial**

1) You can dial the number through your linked mobile phone or input the number through keyboard on the screen directly, like (picture -21).

2) During inputting the number, the input bar will show the number you already inputted, if any mistake, please press [X] icon to delete one by one. Press [call] icon to dial the number, like (picture -21):

3) After dial, it enters into calling interface, you can hang up by pressing , like (picture -22):

➢ **Answer**

1) When a call comes in, the ring of the mobile phone will out from the speaker.

2) When a call comes in, you can choose to answer, reject or mute, if answer it, then it will enters into the answer interface, like (picture -23):

➢ **Phone book**

Touch " Phone book" icon, enter phone book menu. Hereby all the number will be shown. It supports the Blue tooth's phone book, which can be transferred from by the Blue tooth from the cell phone to the car kit.

（picture-21）

（picture-22）
（picture-23）

（picture-24）

---

1) Download the phone book

Inside the phone book menu, touch [icon] icon, select " cell phone " or "SIM" card, then touch "confirm" to download all the information to the car kit. The list of the car kit can display all the phone number, select the number and touch the "Dial" button to make a call,like picture 25
（picture-25）

2) Number searching

Inside the phonebook menu, touch [▲]、[▼] to move up and down to search the number you want. Or you can use number or name searching to find the current contacts ,Click on the [Q] icon, like (picture -26):
A) Letter / spelling / writing input searching

Inside the searching menu, touch [写]、[拼]、[EN] (Pic -26 / 27/28) to shift the key board. Input the letter of each first name + given name to find the number. In case of writing input by hand, just write down the full name is enough. Touch " 完成 " icon, Pic -29, to select the number, then touch [call] to dial.
During the searching, if there is wrong input, just touch [⌫] to delete one by one, then touch [⌨] to hide the key board. Pls note, [⬆] is to shift the capital letter or low case letter. [⎵] is for blank.

（picture-26）

（picture-27）

B)Digital searching

Inside the phonebook menu, touch " 12# " to shift into the digital key board (Pic-30). On the keyboard, input the number directly, then touch " 完成 "(Pic-29) , select this number and touch " 📞 " to dial.

（picture−28）

On the keyboard, touch 笔/金 to shift between Full / Half - width. 1/3 is to change the special symbol, 返回 is to return to other keyboard.
（picture−29）

> ➤ **Bluetooth music playing**

1) If there is Bluetooth music function of this phone, the audio can be transferred from the cell phone to the car speakers. Just open the "music playing" is enough. Or touch the 📀 on the main menu, then touch 🔵 , then music starts playing.
2) Touch ⏮ ⏭ to select previous or next track ⏸ pause; ▶ play. See Pic-31.

（picture−30）

⚠ Note: Only the cell phone with functions of " Stereo playing" or " Remote control" , can operate the music playing menu. The music of cell phone can only be played while the car kit is in the Bluetooth music playing menu.

（picture−31）
