7. Safety Considerations

- 1. In order to protect driving safety and avoid breaking the traffic law, please do not watch the program or use this product when you're driving.**
- 2. Please do not put the product in the damp environment or water, in order to avoid electric shock, damaged and fire accident caused by short circuit.**
- 3. The reversing surveillance function just be used in reversing assistance. Once happened reversing accident does not concern us. And hint of fault message need to be confirmed by professional maintenance Center.**
- 4. In order to safety and ensure the use of product, the installation please leave it to the professional. Do not unload by yourself in order to avoid causing damaged or accident.**
- 5. Start the engine before loading, check the interface whether have function displayed, key control whether correct, the vehicle interface whether have scratch. Please give the feedback to customers if there has any questions.**
- 6. Please note that put the disassemble automotive components in a good way on the installation process, avoid scratching the instrument panel, the leftovers of connect cables need to handle and do not leave it in the car. The connecting plug must be insulated in order to short circuit.**

- 7. The cables should be connected in a good way, the vehicle installation space is small, so reduce space usage as far as possible, and it will easy installation for monitor. There should be a good plan about connect cables, avoid affecting the active component of connecting, such as control components of turning steering wheel, throttle and brake pedal. There need to be fasten after connecting cables in case of drop.**
- 8. Please do not plug or pull the connected cables in the state of power-on, in order to avoid damaging monitor or accessory.**
