

458 ITALIA RVC

SKU# NTV-MOD029

The 458 ITALIA RVC is a send in modification to the factory dash cluster that will allow a rear view camera to be displayed on the LCD screen to the left of the tachometer. The rear view camera is displayed on the factory LCD screen whenever the vehicle is placed into reverse.

NOTE: THE VEHICLE CANNOT BE STARTED OR DRIVEN WITHOUT THE GAUGE CLUSTER. NAV-TV RECOMMENDS REMOVING THE BATTERY TERMINALS PRIOR TO REMOVING THE CLUSTER.

DOES NOT INCLUDE A REVERSE CAMERA

CALIFORNIA VIM XG

SKU# NTV-KIT333

The CALIFORNIA VIM XG is a plug-and-play multi-purpose interface module for Ferrari California and FF vehicles with the double din LCD radio that plays a DVD movie on the factory screen while in park. It allows navigation destination entry without stopping and the factory DVD player to be viewed in any gear and at any speed. The CALIFORNIA VIM XG also allows the integration of a rear view camera, front view camera, FLIR night vision, an Audio/Video input for external A/V sources and an Audio/Video output that allows the image from the factory DVD player to be sent to external monitors. DOES NOT INCLUDE CAMERAS, EXTERNAL A/V SOURCE OR MONITORS
