MAS11

SKU# NTV-KIT369

The MAS11 is a video interface module for select 2011 and up Maserati Quattroporte vehicles that allows a dedicated rear view camera input, in addition to three other composite video inputs, to be displayed on the factory LCD screen. The factory rear view camera input automatically displays the rear view camera image on the screen whenever the vehicle is placed into reverse and the additional video inputs are supported in motion, in any gear, and at any speed for passenger enjoyment. Audio integration requires either the factory aux audio input or an FM modulator for a complete A/V integration experience.
